Subject: FW: [External] American Zinc Products - Gypsum Disposal

Good morning,

Yesterday afternoon AZP contacted Deb Aja with DEQ Solid Waste to notify her of the disposal of 631 tons of gypsum at a Subtitle D landfill that was later determined to be hazardous for cadmium (1.1 ppm). Attached is the information AZP provided to Deb, and she forwarded to us.

It is unclear at this time if the waste gypsum will be removed from Anson County Landfill, but we have asked Solid Waste to keep us informed. We will be in discussions with AZP regarding the storage of gypsum on-site (unpermitted containment building), the frequency of sampling, if enough samples are being taken to be representative, if gypsum is still being used for agricultural purposes, etc.

AZP has submitted their letter under the self-disclosure statute, so we will have internal discussions on how to proceed...Brent

CAUTION: External email. Do not click links or open attachments unless you verify. Send all suspicious email as an attachment to report.spam@nc.gov

Deborah,
Pursuant to our telephone discussion today attached is a letter providing information pertaining to shipments of gypsum made by AZP to the Waste Connections Landfill in Polkton, North Carolina. Also attached are the laboratory analytical results for the composite sample of gypsum, original and re-analysis, reflecting TCLP results of 1.1 mg/l for cadmium.

As discussed with you, I spoke to Tyler Fitzgerald at Waste Connections earlier today. Tyler is copied on this email.

Please advise me if you have any questions or require additional information.

Kind regards,

Tim

TIMOTHY R. BASILONE
